

# AUDIOSCAPE - D3A

Thank you for purchasing the D3A Limiting Amplifier from AUDIOSCAPE Engineering! Inspired by a revered Optical Limiter from the 1970s that has gained a cult following. The D3A is custom built & carefully matched for flawless linked or unlinked operation. Astonishing musical compression curves & a robust mid-range bump adds harmonic complexity to any source. Let's dig into it's features!

## FEATURES

- **Handcrafted in the USA** in Small Batches
- Custom **Louder than Liffoff HyperMatter™ Power Supply & Chassis** delivers superior performance and an astonishingly low noise-floor
- Custom, **Hand-Wound USA Made Transformers** (faithful to original specifications) Faithfully Recreate the Sonic Nuances of the Original
- **AudioScape Exclusive**, Sonically Period-Correct, & Handcrafted **T4B Opto-Attenuator**
- **NOS Metal-Can Transistors & Alpha Pots**
- **CHAIN 1 > 2 Switch** runs ch.1 into ch.2 internally, allowing for extreme dynamic pumping effects coupled with the color of **FOUR** transformers!
- Fully Integrated, **Unique Circuit Modification**, Made Popular by One of the World's most ESTEEMED Mix Engineers
- **HF Emphasis Control** (Fully Variable) - Allows you to FOCUS the Compression to a Specific Area of the Frequency Spectrum
